INFO5990 Assignment Rubric

This is the marking rubric for the assignment. The same rubric is available on Canvas.

Criterion / maximum	Exceeds expectations	Meets expectations	Approaches expectations	Partially meets expectations	Does not meet expectations
1. Organisation, industry and business context **5 marks**	**5 marks** Compelling, internally consistent organisation profile; incisive industry/sector analysis, technology landscape and market gap; BMC is complete, readable and meaningfully informs the proposal.	**4 marks** Clear and well-supported context; relevant market, technology and challenge analysis; BMC is complete and mostly integrated.	**3 marks** Sound organisation and industry description with some analysis; BMC is complete but links to later decisions are uneven.	**2 marks** Basic context and BMC provided; mainly descriptive, with limited evidence, specificity or connection to the proposal.	**1 mark** Context is unclear, implausible or incomplete; industry/sector confused; BMC missing, unreadable or disconnected.
2. Business challenge, governance and IT-enabled proposal **7 marks**	**7 marks** Challenge/opportunity is sharply defined, evidenced and traced to root causes; organisational governance and decision rights are coherent; solution is feasible, innovative where appropriate, and demonstrates a persuasive strategic value proposition.	**6 marks** Well-defined challenge and credible root-cause analysis; governance is clear; solution and benefits align strongly with organisational goals.	**5 marks** Relevant challenge, governance and proposal with generally logical links; root-cause analysis and value case have adequate depth but contain minor gaps.	**3 marks** A recognisable challenge and solution are presented, but analysis is superficial, governance vague, or strategic links asserted rather than demonstrated.	**1 mark** Problem, root causes or solution are unclear/inconsistent; governance absent or unsuitable; little credible business value or strategic alignment.
3. Project methodology, lifecycle and timeline **4 marks**	**4 marks** Methodology is critically selected against credible alternatives and tailored to the project; lifecycle, Gantt chart, milestones, dependencies, roles and timing form a realistic and fully consistent delivery plan.	**3 marks** Methodology is well justified and appropriately applied; timeline, milestones and roles are realistic and mostly consistent.	**2 marks** Suitable methodology and workable high-level plan; some comparison and project-specific application, with minor omissions or inconsistencies.	**1 mark** Methodology is named and broadly described; justification is generic and timeline/roles lack detail, realism or alignment.	**0 marks** Methodology is unsuitable or unexplained; timeline, milestones or project roles are missing or materially inconsistent.
4. Stakeholder engagement and communication **4 marks**	**4 marks** Comprehensive internal/external stakeholder analysis; power-interest mapping drives differentiated, inclusive engagement; communication objectives, content, channels, frequency, ownership and communication risks are precise and actionable.	**3 marks** Strong stakeholder mapping and targeted communication/engagement plan with clear ownership and practical detail.	**2 marks** Key stakeholders are identified and mapped; communication plan is generally appropriate, though prioritisation, risk treatment or tailoring is uneven.	**1 mark** Basic stakeholder list and communication table; limited analysis of influence, resistance, needs or engagement effectiveness.	**0 marks** Important stakeholders omitted; mapping or plan is incomplete, generic, contradictory or impractical.
5. Strategic justification, technology choices, cost, time and resources **6 marks**	**6 marks** Options are evaluated using explicit project-specific criteria and credible evidence; final architecture/tool choice, integration and migration are persuasive; cost, duration, buffers, resourcing, benefits and assumptions are quantified, traceable and mutually consistent.	**5 marks** Strong comparison and selection rationale; estimates are detailed, plausible and aligned across scope, schedule, budget and resources.	**4 marks** Reasonable options analysis and estimates; key assumptions are present, but evidence, quantification or cross-section consistency could be stronger.	**2 marks** Choice and estimates are provided but largely generic, weakly evidenced or only partly feasible; important costs/resources/assumptions omitted.	**1 mark** Little meaningful comparison or justification; choices are infeasible or estimates absent, unsupported or internally inconsistent.

Total: 70 marks

Criterion / maximum	Exceeds expectations	Meets expectations	Approaches expectations	Partially meets expectations	Does not meet expectations
6. IT governance, accountability, compliance and oversight **5 marks**	**5 marks** A project-specific governance framework establishes decision rights, accountability, escalation, assurance and oversight; applicable Australian/industry obligations and standards are accurately interpreted and embedded in controls, reporting and improvement.	**4 marks** Clear governance structure, roles, escalation and oversight; relevant compliance duties are well researched and operationalised.	**3 marks** Suitable governance and compliance coverage with generally clear responsibilities; application to the project has some gaps.	**2 marks** Basic committees, roles and compliance items are listed, but relationships, applicability or oversight mechanisms remain generic.	**1 mark** Governance is confused or incomplete; accountability/escalation absent; key legal, regulatory or standards obligations ignored or inaccurately applied.
7. Change management and adoption **5 marks**	**5 marks** An integrated, project-specific change strategy links a clear vision to impact analysis, readiness, communications, training, resistance, culture and adoption metrics; actions are sequenced, owned, inclusive and responsive to feedback.	**4 marks** Comprehensive and practical change plan with strong stakeholder, training, resistance and cultural alignment.	**3 marks** Coherent change plan covering major elements; adequate project application, with some gaps in ownership, measurement or integration.	**2 marks** Major change topics are present but mainly descriptive; limited evidence of impact analysis, tailoring, feasibility or follow-through.	**1 mark** Change implications are largely overlooked; plan is missing, fragmented or inappropriate for affected people and organisational culture.
8. Quality assurance and testing **5 marks**	**5 marks** QA philosophy, standards, scope, dependencies, entry/exit criteria, test levels/types, environments, responsibilities, deliverables and metrics form a rigorous, traceable and feasible assurance strategy, including post-implementation quality.	**4 marks** Detailed, well-aligned QA and testing strategy with suitable standards, coverage, metrics and deliverables.	**3 marks** Sound plan covering relevant testing and QA elements; some traceability, criteria, dependencies or operational detail is underdeveloped.	**2 marks** Basic testing activities are listed, but QA/testing are weakly distinguished and scope, metrics, ownership or feasibility are unclear.	**1 mark** Plan is absent, technically inappropriate or too incomplete to provide confidence in solution quality.
9. Risk, security and privacy **6 marks**	**6 marks** A justified framework supports a prioritised risk register with credible ratings, owners and treatments; defence-in-depth controls, security testing, incident response and privacy-by-design cover the full data lifecycle and applicable obligations; residual risk and monitoring are explicit.	**5 marks** Thorough, project-specific risk, security and privacy plans with strong controls, response, testing and monitoring.	**4 marks** Relevant risks and controls are addressed using a suitable framework; plans are workable but some ratings, privacy lifecycle, response or residual-risk details are limited.	**2 marks** Generic risk register and controls; weak linkage between assets/threats, ratings and treatment, or limited security/privacy operational detail.	**1 mark** Major risks or privacy/security duties are omitted; ratings and controls are implausible; incident response or data protection is absent.
10. Ethics and professional responsibility **4 marks**	**4 marks** Subtle ethical issues and affected parties are critically analysed; professional codes/standards are accurately applied; a practical decision framework addresses bias, transparency, accountability, data ethics and competing obligations, supported by genuine individual/team reflection.	**3 marks** Strong ethical analysis with relevant professional guidance, actionable decision process and thoughtful reflection.	**2 marks** Key ethical issues, codes and decision steps are appropriately covered; analysis/reflection has adequate but uneven depth.	**1 mark** Ethical principles and codes are described but application is generic; limited analysis of trade-offs, stakeholders or responsibility.	**0 marks** Ethical implications are overlooked or treated inaccurately; codes/framework/reflection missing or merely tokenistic.
11. Monitoring, KPIs and continuous improvement **4 marks**	**4 marks** A concise monitoring framework defines balanced, SMART leading/lagging KPIs with baselines, targets, data sources, frequency, owners and escalation thresholds; ITIL-informed improvement closes the loop from evidence to accountable action.	**3 marks** Relevant, measurable KPIs and a clear monitoring/improvement cycle are strongly linked to strategy, benefits and project disciplines.	**2 marks** Useful KPIs and monitoring approach with general strategic alignment; some targets, ownership, data sources or improvement mechanisms are incomplete.	**1 mark** KPIs are mostly activity measures or lack targets/owners; monitoring and continuous improvement are described only broadly.	**0 marks** KPIs are absent, unmeasurable or unrelated to objectives; no credible monitoring or improvement mechanism.

Total: 70 marks

Criterion / maximum	Exceeds expectations	Meets expectations	Approaches expectations	Partially meets expectations	Does not meet expectations
12. Integration, research, professional communication and presentation **5 marks**	**5 marks** Reads as one persuasive consulting proposal rather than assembled templates: exceptional synthesis, signposting and cross-referencing; claims use high-quality current sources and correct APA 7; visuals/tables are purposeful and readable; writing is precise, accessible and virtually error-free.	**4 marks** Highly coherent and professional report with strong synthesis, credible research, consistent APA 7 and effective presentation; only minor lapses.	**3 marks** Generally coherent, well structured and readable; adequate research and referencing; some repetition, inconsistent terminology, weak transitions or presentation issues.	**2 marks** Template sections are compiled with limited integration; evidence/referencing is thin or inconsistent; expression and formatting issues sometimes impede clarity.	**1 mark** Fragmented or difficult to follow; substantial unsupported claims, poor/inaccurate referencing, unreadable visuals, red instructional text, or serious writing/presentation problems.
13. SparkPlus peer evaluation and professional team participation **10 marks**	**10 marks** Both evaluations completed on time; ratings and comments are specific, balanced, evidence-based and professionally expressed; contribution record demonstrates exceptional reliability, collaboration, leadership and constructive resolution of team issues.	**8 marks** Both evaluations completed thoughtfully and on time; feedback is credible and constructive; contribution is consistently reliable and collaborative.	**6 marks** Required evaluations completed with reasonable care; feedback and contribution are adequate, with only minor limitations.	**4 marks** Evaluation engagement is minimal, late or weakly evidenced; feedback is vague and/or contribution concerns are evident.	**2 marks** Evaluation not completed or responses are careless, collusive, retaliatory or unsupported; significant non-contribution or unprofessional team conduct is substantiated.
